FOURTH SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Pursuant to 37 C.F.R. §1.56 and in accordance with 37 C.F.R. §§1.97-1.98, information relating to the above-identified application is hereby disclosed. Submission of this statement is not to be construed as an admission that any of the documents submitted herewith are "material" to the examination of this application or the patentability of the invention, as the term "material" is defined in 37 C.F.R. §1.56(b).

Specifically, submitted herewith are a photocopy of the International Search Report for Patent Cooperation Treaty application PCT/US02/19294 which is closely related to the instant application and which claims priority from the instant application, and a photocopy of the International Search Report for Patent Cooperation Treaty application PCT/US98/19464, which is directed to the Applicant's basic low pressure dryer for which the instant application represents a number of important improvements.

In accordance with §1.97(b), since this Information Disclosure Statement is being filed before the mailing date of a first office action on the merits of the above-identified application, no fee is required.

Copies of each of the documents listed on the attached Form PTO-1449 are enclosed herewith.

All of the patents listed on the two enclosed International Search Reports have already been submitted to the United States Patent and Trademark Office in one or more of the prior information disclosure statements submitted for this application.

Applicant further notes that one of only two documents listed on either of the two search reports submitted herewith, which is characterized as an "X" or a "Y" reference and therefore is viewed by the International Search Authority as having some relevance to the patentability of this invention, is applicant's prior U.S. patent which issued from the U.S. application which was a counterpart of PCT/US98/19464, noted above.

The other document which is characterized as an "X" or a "Y" reference is a grain storage facility having *no* capability for **below ambient pressure drying** of granular or powdery material, which is a key aspect of the apparatus and method aspects of the invention as claimed in the instant application.

We respectfully solicit a prompt, thorough and favorable examination of the instant application.

Please charge any deficiency or credit any overpayment to Deposit Account No. 50-1943. This form is submitted in duplicate.

Respectfully submitted,

Date: 5 February 2003
